[Look at a picture of a random, unknown person in a magazine or newspaper, and write two complete different description tot that person.]"

WRITING： 9/11/2002

"I happened to look at two pictures of the same person, President George W. Bush, on Page 40 of the Sept. 11, 2002 TIME magazine, and on sheet A5 of the Sept. 7 La Times. I Know President Bush very little only occasionally get some impression of him from the news Media. The first picture portrays President Bush facing the world with a great mass of GIs as His background, all in field combating uniform. The magazine uses a topic "Marching Alone" to imply President's present frustrated situation in his strong intention of attacking Iraq. The second picture is portraying "President Bush called leaders of France, Russia and China seeking their collaboration in dealing with Iraqi President Saddam Hussein. "People love the country and support the president naturally .There is two different Concerns on the President's behavior in the present situation:

"Firstly, President Bush is a good guy but poorly fated. The 9-11 attack must had been planned several years but just happened on his presidency. The accounting scandal in some Of American industries has long been secretly preceded at least several tens of years, but it erupted in his presidency. As the only superpower in the world, for the security of the nation and the world, this country must root out the terrorist. The present bad economic situation is a Natural fall-out of the explosions not caused on his presidency.

"Secondly, President Bush's cow boy manner and style in handling the international Affairs is the root of trouble making. His insistence to implement the controversial horrible NMD and TMD, opposition to the Anti-global warming Kyoto Protocol, and delivery of blunt Speeches to irritate other countries give the world an impression of scrambling for supremacy And make the world feel insecure and unsafe. His intention to dominate the world for hegemony will never succeed but bring this country to more disasters"
